Division Head and Medical Director

Emergency Medicine

1. It is important for you to manage you or your child's medication information. Please carry medication information at all times in the event of emergency situations. Please make sure your primary care provider has an updated list of you or your child's medications (especially when medications are discontinued, doses are changed or new medications, including over-the-counter products are added).
2. The examination and treatment your child has received in the Emergency Department has been rendered on an immediate basis according to your complaint or symptoms. It is not intended to be a substitute for, or an effort to provide complete medical care.
3. If you were given a prescription, take it as directed on the label. All antibiotics should be finished. If you experience any side effects or reactions to the drug prescribed, stop it and call your physician.
4. If your child becomes worse within 24 hours and you cannot see your doctor, return to the Emergency Department.
5. If you have no doctor, ask the Emergency Department staff for the names of doctors in the community, or how to make an appointment in the clinic.

Thank you for using Connecticut Children's Medical Center Emergency Department

"Kids are great, We just make them better"

MyChart

Sign-up for a MyChart account today!

MyChart is Connecticut Children's patient portal. Ask a care team member to help activate your account or visit www.connecticutchildrens.org/mychart to learn more. You can also click Sign Up Now to request access to your child's electronic health record.

Please remember, MyChart should NOT be used for urgent medical needs. If you have a medical emergency, dial 911.

Zero Suicide Safety Plan

During your visit to the emergency department it was determined that your child may be at increased risk for suicide. To ensure your child's safety the care team at Connecticut Children's would like you and your family to review the following information and/or contact community resources:

1. Keep all sharps, medications (prescription and over the counter), weapons and other lethal means locked and away from the patient at all times. Sharps includes items such as box cutters, exacto knives, razors, etc. Over the Counter medications include items such as cough medicine, Tylenol, ibuprofen and any other item that your child can eat or drink.
2. If your child becomes upset or talks about being unsafe to themselves and/or others contact Mobile Crisis by dialing 211. Option 1 then option 1 again and wait for a crisis worker to help you.
3. If your child is in immediate harm to hurting themselves and/or anyone else, please contact 911 or go to your nearest emergency room.
4. You or your child can contact the suicide text line by texting 741741.
5. You or your child can contact the Suicide Prevention Hotline 1-800-273-TALK (8255).
6. You can contact Connecticut Childrens Care Coordination services for ongoing help with connecting to resources in your community at 860-837-6200. They are open M-F 8am to 4:30pm, closed evenings, weekends and holidays.
7. Below are resources that you can connect with for ongoing support.

COVID-19 Guide for Patients, Families, and Visitors

Connecticut Children's is committed to the health of our patients, families and communities. Right now, that includes keeping you informed about the current outbreak of coronavirus.

Visit connecticutchildrens.org/coronavirus for even more information.

WHAT IS A CORONAVIRUS?

A coronavirus is a type of disease that can cause an infection in your respiratory tract: your sinuses, nose, throat and lungs.

The current outbreak of coronavirus, which is also called COVID-19, 2019-nCov, and SARS-CoV-2, was first noticed in December 2019 in Wuhan, China. It has since spread to multiple countries including the United States.

To help stop the spread of coronavirus, we can all follow some basic steps, outlined below.

SYMPTOMS AND RISK

What are the symptoms of coronavirus?

Coronavirus symptoms include fever, cough and shortness of breath. In milder cases, it can present like a common cold.

How is this coronavirus outbreak affecting children?

So far, coronavirus cases in children have been rare, and most children who were infected only experienced mild symptoms, similar to a common cold.

What if my child has not traveled or been around someone with coronavirus, but is showing symptoms?

Keep your child home from school, and contact your pediatrician for medical advice.

PREVENTING CORONAVIRUS

How does coronavirus spread?

Coronavirus seems to spread by respiratory droplets in close person-to-person contact. When a sick person coughs, sneezes or talks at close range, they may produce droplets that can land directly in your eyes, nose or mouth, or on a
